

Garden Room

squeakydesign.info

Garden Room.

Designed and built by Mark James of Squeaky Design.

also Project Manager and on site Consultant.

Built of Douglas Fir and measuring 6.1 metres in four glass panels, of which the middle two panels slide parallel with the outer two to provide a 3 metre wide entrance to the Garden, depth is 4.1 metres.

Other features include controllable ventilation, stainless steel fixings, automatic lighting.

At the start.....

A whole heap of wood..... did I get the Cutting List Right, I did!!!!!!

The Garden Room.....

In the Evening.....

Garden Room showing many features.....

Just settling in.....

Advert in Grand Designs

Magazine....

The lower picture is a Futon Unit I Designed.

Montage.. of Garden Room...

Door made of Northamptonshire Douglas Fir, notice that I used double pegs also the outside of the tree are the horizontals and Diagonal. Also door frame not shown.
